Aryan Pardamwar

DATA ANALYST

Portfolio - Link | +91 9892849866 | Mumbai, India | aryanpardamwar3@gmail.com | LinkedIn Profile

Data analyst with expertise in Python, Power BI, and SQL, skilled in data modelling and extracting actionable insights to support data-driven decisions. Experienced as an intern in analyzing complex datasets and building visualizations to optimize business performance, with strong communication and teamwork abilities to collaborate effectively across teams.

SKILLS SUMMARY

- **Advanced Excel**: Complete excel with Versatile Data Manipulation, Analysis and visualization using ETL tools.
- **Power Bi:** Dynamic data visualization for insights; compelling presentations of complex data.
- **Python:** Comprehensive data analysis, automation; statistical analysis, machine learning support.
- **SQL:** Proficient in database querying, manipulation; extracting valuable insights, ensuring data integrity.
- **Other Skills:** Effective communication, strong analytic skills and visualization capabilities by leveraging Big Query with Excel and Power BI.

CERTIFICATION AND TRAINING

- **Core Python Certification** Python Certificate
- **Data Science Bootcamp** Data Science Certificate
- **Google Data Analytics Professional Certificate**

EXPERIENCE: INTERNSHIP & PROJECTS

AR Associate Trainee | GeBBS Healthcare Solutions |Oct '25 – Nov'25 | Mumbai, India

- Worked as an AR (Accounts Receivable) Associate Trainee focusing on healthcare revenue cycle management.
- Assisted in claim follow-ups, denial analysis, and payment posting processes.
- Ensured accuracy and compliance with healthcare billing standards.
- Gained hands-on experience with healthcare data, improving attention to detail and process efficiency.

Data Analyst Intern | Unified Mentor – *Jun '24 – Jul '24* (Remote)

- Completed 2 projects providing insights into business challenges.
- Performed data cleaning, statistical analysis, and machine learning using MySQL, Python, Power BI, and Excel.
- Built impactful dashboards aligned with business objectives.

Data Science Intern | NULL CLASS – *Aug '24 – Oct '24* (Remote)

- Completed 5 end-to-end data science projects.
- Applied data preprocessing, ML modelling, and visualization techniques.
- Delivered solutions aligned with real-world business and AI use cases.

1. Emotion Detection Through Voice | Link
   - Emotion detection through voice is a powerful technology that analyses vocal features such as tone, pitch, speed, and rhythm to determine a speaker's emotional state.
   - This technology is commonly used in applications like customer service, mental health assessment, and human- computer interaction, where understanding emotions can significantly improve outcomes
2. Attendance System Model | Link
   - Emotion detection through voice is a powerful technology that analyses vocal features such as

tone, pitch, speed, and rhythm to determine a speaker's emotional state.

- This technology is commonly used in applications like customer service, mental health assessment, and human- computer interaction, where understanding emotions can significantly improve outcomes.

3. Age and Emotion Detection for Movie Theatre | Link

- Age and Emotion Detection for Movie Theatres is an innovative application of artificial intelligence (AI) and computer vision technologies that can transform the movie-watching experience.
- By using sensors, cameras, and advanced algorithms, movie theatres can analyze the audience's reactions in real- time, gaining insights into their emotional responses and demographic information.

4. Deep Face Project | Link

EDUCATION AND QUALIFICATIONS

Bachelor of Science – IT **[Priti Academy Degree College, Ulhasnagar]** **2024**
